# Dubai Market Report

SEPTEMBER 2026 EDITION

The numbers below are Dubai Land Department transaction data, as compiled by DXB Interact. Nothing here is a forecast and nothing is a promise — it is what has actually traded. Where we give a view, it is marked as ours.

## PRICES

Median ready stock trades at **AED 1,484 per sq ft** in 2026 to date (2025: 1,385, up 5.6% on 2024). Off-plan trades at **AED 1,762** — a 19% premium to ready, down from a 66% premium in 2019. New launches are no longer priced at a discount to the built city.

## VOLUMES

2025 was the market's biggest year on record. 2026 to date is tracking close behind (98,330 sales), but the mix keeps shifting to off-plan — 73% of all transactions — and several prime ready districts are seeing volumes fall while prices still rise.

> **THE DESK'S READ**
>
> Momentum is real, but this is a market that now rewards selection over timing. The easy 2021–2024 appreciation is behind us; the spread between areas (yields from 4.4% to 8.3%) and between developers (12-month resale gains from 6% to 31%) is where returns will be made or lost. Underwrite the exit flat and let growth be the upside.

WHERE THE YIELD ACTUALLY IS — APARTMENTS, LAST 12 MONTHS

| AREA | AED/SQ FT | 12M PRICE | GROSS YIELD |
|---|---|---|---|
| Dubai South | 1,149 | +18% | 8.3% |
| Jumeirah Village Circle | 1,341 | +7% | 7.3% |
| Business Bay | 2,000 | +4% | 6.8% |
| Sobha Hartland | 2,050 | +4% | 6.1% |
| Dubai Marina | 1,931 | +13% | 5.9% |
| Dubai Hills Estate | 2,377 | +6% | 5.7% |
| Dubai Creek Harbour | 2,369 | +6% | 5.3% |
| Downtown Dubai | 2,784 | +4% | 4.9% |
| Emaar Beachfront | 3,567 | -1% | 4.6% |
| Palm Jumeirah | 2,806 | +8% | 4.4% |

*The pattern: the further from the postcard, the higher the yield. Prime is a capital-growth play; the growth corridors are the income play. Which one is right depends on what you need the money to do.*
